EDUCATION

2023 - Present
**DANANG UNIVERSITY OF
SCIENCE AND TECHNOLOGY**

- Information Technology
- Final-year Student
- GPA: 3.8 / 4.0

SKILLS

TECHNICAL SKILLS

Web Development:

- Frontend: HTML, CSS, JavaScript, ReactJS, TailwindCSS
- Backend: ExpressJs

Mobile: dart

Database: MySQL

Tools & others: PostMan, Git, Github, Trello, RESTful API

TRAN NGOC TIEN

FULL-STACK & MOBILE DEVELOPER

PROFILE

I am an Information Technology student passionate about Mobile and Full-Stack Development. I enjoy building practical, user-friendly applications and working across both frontend and backend technologies. I am adaptable, responsible, and always eager to learn, take on new challenges, and grow as a developer.

WORK EXPERIENCE

Project basic learn.

08/2025 - 12/2025

Expense Management App

<https://pbl-cnpm.web.app/>

Developed a cross-platform personal finance application using Flutter, enabling users to track income and expenses, manage budgets, and monitor transactions by category.

- Role: Member
- Designed intuitive UI/UX using Figma for a clean and user-friendly experience.
- Integrated Supabase for backend data management, authentication, and real-time database.
- Implemented data visualization (charts) to provide financial insights.
- Built an AI-powered chatbot using Gemini API to deliver spending analysis, budgeting advice, and personalized financial suggestions.
- Managed tasks and workflow using Trello.
- Technologies: Flutter, Supabase, Figma, Trello, AI Chatbot (Gemini API)

Project basic learn.

01/2026 - Present

Mobile App - Teleprompter

<https://teleprompt-fau.web.app/>

Developed a cross-platform mobile teleprompter application using Flutter, helping content creators record videos while reading scripts smoothly.

- Role: Mobile Developer
- Developed script and folder management features, including script creation, editing, importing, exporting, and AI-assisted rewriting.
- Built a customizable teleprompter with automatic scrolling, speed control, text formatting, margins, mirroring, and timer settings.
- Integrated camera and microphone features for video recording, including Picture-in-Picture support.
- Implemented video editing tools such as trimming, resizing, watermarking, intro/outro insertion, and subtitle styling.
- Integrated speech-to-text for automatic subtitle generation and FFmpeg for video processing.
- Integrated an AI service to generate, summarize, expand, and rephrase scripts.
- Managed runtime permissions, local storage, media gallery access, and application state.
- Technologies: Flutter, Dart, BLoC/Cubit, FFmpeg, REST API, Speech-to-Text, SharedPreferences
